

# Summary Report: ACE v3.3 Security Vulnerability Scanning

Created by Pintu Kumar, last modified just a moment ago

## Overview

This reports contains summary of the Adeptia Connect Enterprise v3.3 Security vulnerability scanning result.

Priority	Summary	Status	Comment
Low	Concurrent Sessions Allowed	False Positive	This is as per implementation. Adeptia Connect allows multiple concurrent session for single user.
Low	Sensitive Information Passed Using GET	False Positive	This is the behavior of SAML IDP server. Username is sent to fetch the user's image. This may vary from IDP server to server.
Medium	Cookie Missing HTTPOnly Flag	Planned in v3.4	
Medium	JavaScript Library Contains Known Vulnerabilities (Older Version of JQuery and Sencha)	To be planned
